

Two hands can be used!

NO.9892B

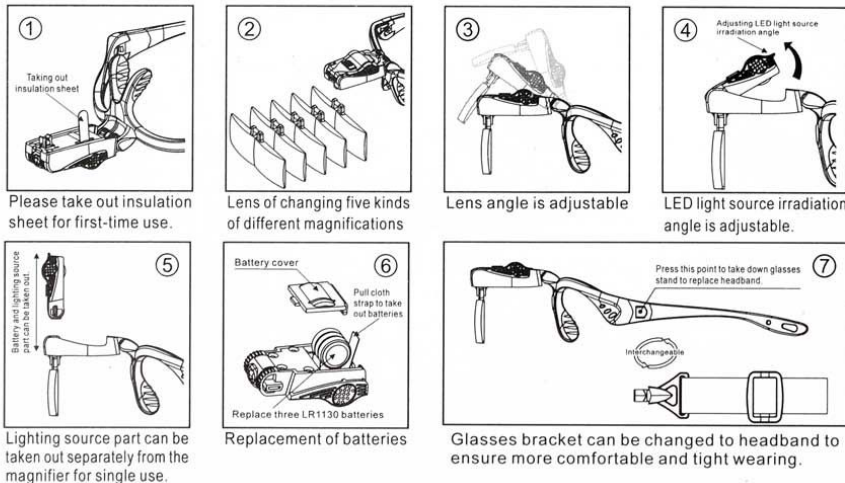

WITH TWO LED LAMPS, BRACKET AND HEADBAND IS INTERCHANGEABLE.

Characteristics:

- Easily used for reading books and newspapers, drawing pictures, handicrafts, appreciating flowers and miniature landscape;
- This magnifier is attached with five elongated lens that can change magnification. External specification of new lens: 85mmX8.5mm. Five kinds of multiples: 1.0X, 1.5X, 2.0X, 2.5X, 3.5X;
- Open LED lighting source in poor light;
- It is advisable to adjust lens angle and LED light irradiation angle to ensure that light source can irradiate the surface of viewed object accurately and make it more convenient in use;
- Common bracket-type magnifiers can easily fall off during use because lens and LED part are quite heavy. This produce can solve this problem completely. If you need to wear this magnifier for long time, it is advised to change bracket into headband state, which can make work comfortable.
