

## ***Sample PDF document for printing labels on satin or taffeta.***

We advise you to make your model at least twice the final size of the label to get a very good quality. Insert images with a resolution of 300 dpi (300 dots per inch).

All fonts, all characters, including graphics, are allowed).

We also advise you to materialize the edges of the label by a frame (which will not be printed). And You will specify perfectly the composition of your labels, including necessary margins for stitching or folding if they should be folded.

Please also indicate the size and color of the desired impression. In our offer printing is monochrome and color should be chosen in the range that we offer depending on the size of the label.

You can save your artwork in PDF format :

- by using a program that embeds this function directly (Photoshop, OpenOffice, LibreOffice),
- by installing a "PDF printer" ([PDFcreator](#)) . Carefully set your PDF output indicating to the program in its options to embed the fonts and integrate the images at 300 dpi.

### ***Composition label example on polyester taffeta or satin Opera***

#### **Final dimensions of the label:**
